Community Based Services

## **What is the ICF/ID Transition Program?**

The purpose of the program is to give a limited number of people, living in an ICF/ID within Utah, the chance to transition into the Community Supports Waiver. This waiver provides services and supports to people who live at home or in other community based settings. The day to day operation of the waiver is managed by the Division of Services for People with Disabilities. For more information you can visit:

<http://www.dspd.utah.gov>

## **Can I choose to stay where I am?**

Yes. This program is completely voluntary.

## **Who is eligible for consideration in the program?**

Interested individuals wanting to participate:

- Must live in a Utah ICF/ID for at least 12 months in a row,
- Must be on Medicaid, and
- Must fill out an application and either submit it by mail or fax to the Utah Department of Health by Dec. 31, 2016.

## **Can all eligible individuals participate?**

No. There is a limited amount of money for this program and only eligible individuals selected and contacted by Medicaid may participate.

## **How are people selected for the program?**

Half of the people are selected based on how long they have lived in an ICF/ID and the other half are selected through a random process. This allows all eligible individuals an equal opportunity to be included in the program.

## **How can I learn more?**

The best people to contact are:

- The Administrator of the ICF/ID where you live
- Any of the contacts listed on the left side of this fact sheet
